English, Urdu, Pashto, Persian (Farsi) basic

SUMMARY

I am a self-taught, highly passionate Developer and hobbyist. I've used a vast amount of online resources to learn various aspects of computer science in which I have deep interest. My primary source of computer science knowledge has been the MIT Opencourseware and some other too.

I spend time on Projecteuler.net, Hackerrank.com and Google foo.bar to sharp my problem solving and coding skills which turns out to be a lot of fun. I also do mock interviews on Pramp.

My primary expertise is in Algorithms, advanced Python programming and writing Django based web applications and also Ipython/Jupyter-notebook. I've used JS for only solving puzzles.
